

Dear Producers,

July 26, 2019

On July 31st, 2019 American Access Casualty Company will be permanently deactivating support for unsecure browser protocols such as TLS 1.0 and TLS 1.1. We are doing this to remain compliant with various entities' security requirements.

On August 1st, 2019 and after, if you cannot connect to our website, www.aains.com, and the AAXIS application (because your browser does not support TLS 1.2), you will be automatically directed to the page referenced below with instructions on how to upgrade your browser to a secure version. If you have any issues, please contact your Marketing or Underwriting Representative.

Browser Security Update Overview
