

We are excited to announce that on 1/13/2022 our insureds will be able to take advantage of a paperless communication option of which will be rolled out in 2 phases. The first phase will only include notification via email with the second phase adding the SMS/Text notification options. Additional communication and materials demonstrating how insureds can opt in will be available immediately preceding the second phase (SMS/Text notifications). We've included some screens shots as examples of what the insureds will see in the portal.
